

Zack Scaite

A Vase

Bore Case

Hello everyone, I am **Zack Scaite**,
a detective from **California**. I just
started being a detective 3 weeks
ago and I am very famous now. If it
like this, I think I will be the next
Sherlock Holmes. You may think
why this book do not have anything
like introduction or something, it is
because I am too lazy. None of my
book will have any of those. So this
book is having my 1st case and I will

also continue writing more books of my cases. Well, this case starts when I was watching youtube at my office. Actually, I also have a youtube channel. I am not anyways telling anything more about that to you. Anyways, let's continue.

Suddenly, someone rang the bell. I paused youtube and went outside to look who was there. By the way, I was watching a Dhar Mann video.

That was really good, I also suggest you to check out his channel. Yea the bell rang and I went outside to see who it was. It was a fat man with brown coat, one spectacle, a magician like brown hat. He seemed like a rich person. He asked me "Are you **Zack Scaite the detective**?" I said him yes and he said he have a case for me. I was very happy to have my first

case. Before he said anything, I did something like *Sherlock Holmes*. I said him "You are from a rich family. I can get it from your expensive coat and hat. You are also here with a bag with very weight which shows me that you are having an important case for me." And he was like "So?" which he didn't want to say. I asked him what's the case and he told "Wow, I am impressed

with the things you found about me
before I even start talking. I am
Allen Uron. Yes, just like you said
I am *rich*. Not just rich, *super-*
rich. I am not here for any murder
case or anything. I am here for a
stealing case. Someone stole my
very precious vase. It is not mine, it
was given to me by my father, to
whom it was given by my
grandfather. It is made from gold

A Vase Bore Case - Zach Scaite

and there is a precious red colored diamond at its center. I can buy one of it at any second now, but the thing is that this is my last memory of my father. He was an explorer. I saw him before 32 years when he was going on an adventure to Nepal. He used to scold me whenever I got near that vase. It is very precious to me. Please help me.". I then asked him that isn't there any

CCTV cameras in his super rich house and he said no. When I asked why, he said he had securities in his house. He also told me that his securities saw someone running out of his house at that time and they were not able to catch him. I told him I wanted to question his securities and he said he will bring them tomorrow. I also told him that I didn't want to come to his house.

What to do? Over Confidence. The

next day when he brought the securities, I asked him that was he busy on something yesterday and he said no. Then I asked the four securities some questions and told Allen that I wanted to visit his house. He said ok and we both went to his house. Out of nowhere, he suddenly told me that he has a suspicion of someone called

Elsor Gary who was his old business partner. He told me that Elsor always wanted Allen to sell this vase. Elsor also cheated on Allen and was stealing Allen's money. So Allen kicked him and Elsor was always mailing Allen that he is coming for revenge. And two days ago, Elsor sent him a message called the revenge is near. He showed me all those messages.

After he said all these, I told him "Stop Allen, stop. I found out who stole your vase." And he was like "I know sir, it is Elsor". I told him "Nah, stop acting. It is you." He asked me "What are you saying young man? I complained about myself to you? Come on, use your brain." I said "Now I will tell you the entire story. But first let me call the police.". He started

running and his own security guards
cached him for me. Then sometimes

later, the police came and I
explained them everything. They
took all the securities and Allen
with them. Now, I will tell you
guys the story. Here, this was a
plan between this Elsor and Allen.

Allen wanted to have some money
for growing his company as it is
having many problems after Elsor

left. I secretly investigated about all these things about Allen's company even before he told me about Elsor. Let's just move to the remaining story. Yea, Elsor wanted to wanted to defeat Allen anyways. But, he was not the one who stole Allen's vase. It was Allen himself.

All the messages except "The Revenge is near" had an almost same timing. But this was done at another

time. When I investigated more about Allen and his company, I had also found out that Allen is a computer engineer and he is also having many hackers working for his company. So somehow he hacked Elsor's mail and sent that message.

Another evidence for this is that Allen was on a leave that day. At that day when Allen came to my office, he came with a lot of money

just as advance. And it to a new detective without any experience. Also when I asked him to bring his securities, he said he will bring tomorrow. At that day, I also asked him was he busy yesterday and he said no. He also came at morning time that day, so he was able to bring his securities that day. I also asked his securities that didn't any one of them come yesterday? They

all said that they all were at there. So that also shows us that Allen was actually able to bring them that day. Allen gave these guards money and also told him he will kill them if any one of them said anything about it. I used a lie detector and found out all these from them. Then I made a deal with them that the police will not arrest any of them if they stop Allen from

A Vase Bore Case - Zach Scaite

escaping. Even if I broke the deal, I will find a good lawyer for them. Then I found out that Allen's plan was to sell his vase to someone else without revealing his identity and then he will put it all on Erson. Erson actually haven't cheated on Allen, Allen kicked him out because Erson was against some of Allen's decisions and also pointed out that Allen is doing many bad things.

*Some things from the ending are
told to me by the police. Hope you
like my first case. I will also start
writing many books about my cases.*

Bye.

About the author

A great detective from California. He solved his first case just in three days. Let's just wait and see what all wonders will he do in his other cases.

Wanna mail me? Sorry, I
am not giving you my email.
But, you can mail my new
internet agent.
